

The 12th TRIZ Symposium

in Japan 2016

Enrich Your Creativity with TRIZ!

The 12th TRIZ symposium closing a meeting

(TRIZ Symposium 2016 in Japan)

Enrich Your Creativity with TRIZ.

(1st – 2nd in September of 2016: Waseda University

The west Waseda campus No. 63 building 2F)

Japan TRIZ Society, Non-Profit Organization

Vice Chairman

Manabu Sawaguchi

Take a look back on “The 12th Japan TRIZ symposium.

This year, we convened TRIZ symposium as a symposium of two days (weekday).

We think “weekday’s symposium (two days)” is getting popular.

We think majority of participants came from Japanese companies this year.

However, we feel the expansion of the business scale of the participating company and the extension of the type of business.

We want to appeal to the person related to the university from now.

- Tutorial

As usual, the tutorial was executed in the morning of the first day this year.

Mr. Cosya practiced the tutorial based on the participation type with taking a lot of exercise regarding “systematic approach”

- Special lecture

We invited professors emeritus Suzuki [Hokkaido University], Nobel Prize Chemistry winner in 2010, at this year' s symposium and asked him special lecture about " an example of useful science" on the afternoon of the day.

We expect that a lot of participants reached the whole story regarding to the organic chemistry synthesis. Do you really understand it? . However, we think that participants got a brief glimpse of sprits of excellent researcher in the first line through the Q&A.

- keynote lecture

We arranged keynote lecture by Mr. Alexander Kudriavtsev, as one of TRIZ masters on the second day' s morning.

Difficult Problems and New Horizons Development of the notion of Difficulty in TRIZ

・〈General presentation〉

1st day :12 oral presentations, 2nd day: 10 oral presentations

The poster session :5 poster presentations (2nd day)

Total number of presentations :12+10+5=27

This year' s number of presentation increased from 25 in last year to 27

It is expected that the number of speakers will be increased in next year.

・The number of participants was improved.

The number of participants (including overseas)

Last year :111 ⇒ **This year:141**

From overseas, four people (Taiwan, South Korea, Kenya, Russia) participated.

Next year's symposium(the 13th) is expected to be more attractive and more numerous participants

■ Symposium executive committee
