

Call for Papers to “The 14th TRIZ Symposium in Japan, 2018”

February 19, 2018
Executive Committee of the 14th TRIZ Symposium in Japan
Japan TRIZ Society, NPO

For the purpose of open presentations, discussions and communications on the creativity & innovation methodology TRIZ and related topics, the Japan TRIZ Society, NPO, is going to hold “The 14th TRIZ Symposium in Japan, 2018”.

Date: September 13th (Thursday) through 14th (Friday), 2018 (2 days)
Location: NAKANO SUNPLAZA, Tokyo, Japan

Many application cases have been introduced and studies have been conducted by Japanese and overseas users on TRIZ (Theory of Inventive Problem Solving) as a philosophy, technology and knowledge engineering tool strongly supporting not only technical innovations in the industry but also reform of software and business models.

The main theme of the TRIZ Symposium this year will be "**Realize your Dream with TRIZ!**"

The current circumstances surrounding us warrant little room for optimism for the future in all aspects of both economy and environment. Now is the time for us to exercise wisdom for developing new products, creating new business and markets, preventing environmental damage to create a society where we can have hope in our future.

It is possible to open the way to a bright future and realize our dream using the TRIZ methodology. We would like you to combine the wisdom of all of you for the next leap forward into the future.

We believe that many useful clues will be provided through presenting and discussing study results and research outcomes regarding TRIZ. We hope that the comments you receive at the Symposium will lead to further development of your work. You are very welcome to contribute your presentation to the Symposium.

We look forward to your active application.
