

## Call for Participation in the “22nd Japan TRIZ Symposium 2026”

2026. 6. 5

Japan TRIZ Society

Chairperson, The 22nd Japan TRIZ Symposium

The Japan TRIZ Society, NPO, is going to hold the 22nd Japan TRIZ Symposium 2026 in order to widely present, discuss and communicate about the creative technical innovation method “TRIZ.”

Since TRIZ was introduced to Japan in 1996 as a philosophy, methodology, knowledge, and engineering tool for strongly supporting technological innovation in industry, many domestic and international users interested in TRIZ have shared practical application cases and advanced TRIZ research. As a result, we have held the TRIZ Symposium 20 times so far, every year. (Excluding 2020 during the COVID-19 pandemic)

This Symposium offers a wealth of information essential for the development of innovative products, technologies, and systems. We are confident that through discussions during the presentations and interactions with participants, you will gain useful information and insights about your technologies and products.

We warmly encourage you to join us and look forward to your participation.

For participation, please apply from:
